

PARENT/GUARDIAN CONSENT EXCEPTIONS

A parent or legal guardian must provide consent on behalf of a minor (under age 18) before health care services are provided, with **several important exceptions**:

- **Emergency care** ⁱ
- **Care for independent minors** ⁱⁱ
 - Age 16 or older, living apart from parents *and* managing their own financial affairs; OR legally married; OR minors who are prosecuted as an adult in the justice system and confined to a correctional institution (except for abortion and sterilization procedures)
- **Specific health care services related to:**
 - Sexual health
 - Mental health
 - Substance use treatment

Patients under 18 have the right to the following WITHOUT parent/guardian consent:

Pregnancy testing, birth control information, and contraceptives only if:ⁱⁱⁱ
 minor is married, pregnant, or a parent OR
 a physician determines probable health hazards would occur if services are not provided
 Medical and surgical care related to pregnancy^{iv}
 Emergency contraception^v
 Testing and treatment for sexually transmitted infections/STIs (including HIV)^{*vi}
 Substance use treatment, including alcohol or drugs^{vii}
 Outpatient mental health services (age 13 and above) if:^{viii}
 Treatment may not exceed 2 visits during a 1-week period
 Does not include mental health medications and some types of therapy

*Florida law does not expressly allow minors to consent to HIV pre-exposure prophylaxis (PrEP) without parental/guardian involvement.^{ix} It is considered best practice as part of routine STI prevention to counsel clients on PrEP use when indicated or requested. However, we recommend that you confer with your legal and/or risk management team, and state public health officials, to develop institutional policies around providing PrEP without parental/guardian consent. You can contact the HIV/AIDS Section of the Florida Department of Health at DiseaseControl@flhealth.gov.

MINORS NEED A PARENT/GUARDIAN’S PERMISSION FOR:

- Vaccines (including HPV)^x
- Mental health medications^{xi}
- Abortions (unless judicial bypass waiver is obtained)^{xii}

HEALTH CARE PROVIDERS MUST OVERRIDE THE MINOR’S CONFIDENTIALITY AND REPORT IF:

- The minor is a risk to themselves or someone else
- There is suspicion of abuse or neglect
- Sexual activity occurred that was nonconsensual, without equality, or as a result of coercion
- The minor is under age 16 and has been sexually active with an adult over the age of 24

LAW FOR PELVIC EXAMINATIONS:

Under legislation effective July 1, 2020, a provider must obtain written consent from the patient or their parent/guardian before performing a pelvic examination, unless one of the following exceptions applies:^{xiii}

- The examination is ordered by a court, OR
- The examination is immediately necessary to prevent serious risk to the patients’ health

For services that minors can consent to (e.g. STD testing and treatment), minors can consent to a pelvic examination themselves, without needing a parent/guardian signature.
